

FROM THE DESK OF CHAIRPERSON, CCMT-2018

It's a pleasure to be able to congratulate all the candidates on their amazing success for the admissions to M. Tech./M. Arch./M. Plan. programmes. I welcome each one of them to the Centralized Counselling Process, CCMT 2018. It's a matter of pride that National Institute of Technology Delhi, is going to host CCMT 2018.

Education plays an important role in the nation building and technical education is an integral and most essential component of it. It acts as a catalyst to build and develop knowledge-based society to uplift the nation. It is significant to make constant attempts and efforts to quantify and maintain quality in technical education, for which selection process is of primary and fundamental importance. In our sincere effort to achieve this goal, and to empower the technocrats to become magnificent human resource for the holistic development of the lives and society and crystalizing the future, CCMT 2018 is resolute to select the bright students for the post-graduate programmes in premier technical institutes of the country. CCMT is to provide user-friendly platform to the students for admission to their post-graduate programmes.

Similar to the last year, all the admissions in participating institutes will be made on the basis of GATE score in the respective categories. To provide better opportunity to all eligible candidates for getting admission and full utilization of resources available with participating institutes, there will be three regular round of allotment followed by National Spot Round (NSR). In order to reduce the physical, mental, and financial burden of the candidates, single application can be filled for all the participating institutes and the same will be acting as the reporting and the help center. Candidates can contact the nearby reporting centers for help and to participate in the seat allotment process. With 30 NITs, 05 IITs and 09 Centrally Funded Technical Institutes having more than 300 programmes, CCMT HQ at NIT Delhi, participating institutes, and reporting centers are putting their sincere efforts to facilitate all aspiring and deserving candidates.

Being an online process of counseling, it is my duty to advise all the GATE qualified candidates to read, compile and analyze complete information about the institutes, programmes offered, eligibility conditions, fee structure, and all other relevant facts before filling the application form and their choices for institutes and programmes. Choice filling, editing of choices, locking of choices are important processes and should be done well in time by the candidates as per the schedule. In order to avoid any ambiguity, mistakes or missing any important step/ date, candidates are advised to go through the Information Brochure for details of admission process.

On behalf of the CCMT 2018, I would like to place on record the excellent support received from the members of the Technical Committee including the members from NIC, SBI and Local Organizing Committee in meticulously working out all the details. I am sure that the CCMT 2018 admission process will provide a simplified and better way of admission without compromising with the quality of students and efficient utilization of available resources. I once again wish all the best to students as well as the participating institutes.

Dr. Lalit Kumar Awasthi
Chairperson, CCMT-2018
Director, NIT Delhi
